

To-Do List App (Developers Team)

Meeting 7

Meeting Date:20/05/2024

Developer Team	Client Team
SAMAR YEHIA MOHAMED HEGAZY	ABDEL AZIZ MOUNTHER QUDEIH
SHAMS IMAD ABDULJABBAR	AHMED ALIDLBI
UMAYYA HASAN DREJ	MOHAMAD MALEK ALKHODARY
	HAIDAR KAHLA

This report covers our seventh customer meeting and our development progress on the "Quick Tasks" app this week. We focused on creating the Welcome Page, featuring the newly selected logo and providing Signup and Login options. We also added features for displaying task dates and allowing task descriptions to enhance user experience. Additionally, we resolved a technical issue that had prevented us from capturing simulator screenshots and successfully obtained them this week.

Quick Tasks" Development Progress:

This week, the development team made significant progress on the "Quick Tasks" application, focusing on three key areas:

1. "Quick Tasks" Logo

Following customer feedback, we chose this logo to represent the "Quick Tasks" app. The design is simple and memorable, featuring a blue checkmark symbolizing task completion. The bold, blue font reinforces the feeling of efficiency and productivity associated with the application. Overall, the logo effectively conveys the app's purpose in a visually appealing way.

2. Welcome Page Design and Implementation:

- Collaborative Design Process: Following productive discussions with the customer team, we prioritized the design and development of the Welcome Page. This initial screen serves as the user's first impression of the app, and we ensured it aligns with customer expectations.
- Prominent Logo Integration: After the official app logo was chosen, we prominently featured it within the Welcome Page design. This reinforces brand recognition and provides a visually appealing introduction to the application.
- Seamless User Onboarding: The Welcome Page was integrated with features that allow users to either sign up for a new account or log in to an existing one. This is a critical component for user management and access to the app's core functionalities.

3. User Experience Features:

We integrated two key features to enrich the task management experience:

- Task Date Display: Each task within the application will now display its corresponding date. This feature provides improved organization and clarity for users. They can easily identify deadlines and prioritize tasks based on their scheduled dates, promoting efficient task management.
- Task Descriptions: We implemented a functionality allowing users to add detailed descriptions to their tasks. This empowers users to create a more robust task management

system. By including additional information alongside each task entry, users can further enhance their organization and task clarity.

Technical Resolution:

An unexpected technical issue with the laptop containing the previous week's code initially prevented us from capturing simulator screenshots for your reference. We're happy to report that this issue has been successfully resolved. This week's report includes simulator screenshots to showcase the latest visual progress on the "Quick Tasks" application.

Previous Week	Current Week	Next Week
<p>Last week, our team focused on designing and demonstrating the registration and login pages for the "Quick Tasks" application. We incorporated customer preferences and requested features to ensure these pages provide a seamless and secure user experience. We showcased the functionality of both pages, highlighting their user-friendly design and robust security measures.</p> <p>Additionally, we gathered customer feedback on the login and registration functionality. We used this feedback to refine and finalize the design, ensuring an optimal user experience.</p>	<p>We designed and implemented the Welcome Page, prominently featuring the newly chosen logo. This page provides users with seamless options for Signup and Login, enhancing their initial interaction with the app.</p> <p>We also integrated features to display task dates and allow users to add descriptions to their tasks, thereby improving the task management experience and making it more user-friendly.</p> <p>Following customer feedback, we finalized the app logo. The design, featuring a blue checkmark and bold font, effectively conveys task completion and productivity, aligning with the app's purpose.</p> <p>Additionally, we resolved a technical issue with the laptop containing last week's code, allowing us to capture the necessary simulator screenshots for documentation and testing.</p>	<p>The focus for week eight is building the data storage foundation for "Quick Tasks":</p> <ul style="list-style-type: none">-Database Design & Implementation: We'll define the structure to store user data (tasks, descriptions, due dates) efficiently.-Data Access Layer Development: This component will bridge the app and database, handling data retrieval, storage, and manipulation. <p>These steps ensure a robust system for managing user data in "Quick Tasks".</p>
